

DEPARTMENT OF DEFENSE—MILITARY PROGRAMS

MILITARY PERSONNEL

ACTIVE AND RESERVE FORCES

These appropriations finance the personnel costs of the Active, Reserve, and Guard forces of the Army, Navy, Air Force, and Marine Corps. They include pay and allowances of officers, enlisted personnel, cadets and midshipmen, permanent change of station travel, inactive duty and active duty training, accruing retirement and health benefits, enlistment, reenlistment and affiliation bonuses, special and incentive pays, and other personnel costs. Over the past several years, significant pay increases, coupled with new requirements to accrue funds for future health benefits, have significantly increased the requirements of these appropriations.

Included in these accounts is funding for a 1.6 percent across-the-board pay raise. With this and other compensation increases, military salaries, as defined by Regular Military Compensation, which includes basic pay, a tax-free allowance for housing or the value of in-kind housing, a tax-free allowance for subsistence (food) and the tax savings because these allowances are tax free, will average more than \$53,000 for enlisted personnel and more than \$102,000 for officers. Many military personnel also receive one-time or yearly bonuses, monthly special pays, other allowances, and significant non-cash benefits, including comprehensive health care. Also included in these appropriations are the amounts required to implement items contained in the Department of Defense's (DOD's) proposed 2012 Authorization Act, which will be submitted in support of the 2012 President's Budget.

The Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 (P.L. 108–375) provided permanent, indefinite appropriations to finance the cost of accruing TRICARE benefits of uniformed servicemembers. These costs are included in the DOD discretionary total. The following summary table reflects the actual base and supplemental 2011 amounts and the base 2012 military personnel appropriation request and the additional amounts for TRICARE accrual funded from permanent, indefinite authority. Total base 2012 military personnel requirements are \$142,829 million.

The Reserve Officers' Training Corps (ROTC) program provides training for reserve and regular officer candidates who have enrolled in the course while attending a college at which an ROTC unit has been established. College graduates who satisfactorily complete the advanced course of the program are commissioned and may be ordered to active duty for a minimum of three years.

The Reserve Officers' Training Corps Vitalization Act of 1964, as amended, authorizes a limited number of scholarships for ROTC students on a competitive basis. Successful candidates for the scholarships generally serve a minimum period of four years on active duty upon graduation and appointment as a commissioned officer. A number of scholarship recipients will fulfill their entire obligation in the Reserve components.

The Armed Forces Health Professions Scholarship Program provides a source of active duty commissioned officers for the various health professions.

The numbers of commissioned officers graduated from these programs are summarized below:

OPERATION AND MAINTENANCE

These appropriations finance the cost of operating and maintaining the Armed Forces, including the Reserve components and related support activities of the Department of Defense, except military personnel pay, allowances, and travel costs. Included are amounts for training and operation costs, pay of civilians, contract services for maintenance of equipment and facilities, fuel, supplies, and repair parts for weapons and equipment. Financial requirements are influenced by many factors, including the number of aircraft squadrons, Army brigades and Marine Corps regiments, installations, military strength and deployments, rates of operational activity, and the quantity and complexity of major equipment (aircraft, ships, missiles, tanks, et cetera) in operation.

This account transfers funds to operation and maintenance and military personnel appropriations, for Defense activities that purchase foreign currencies, to finance upward adjustments of recorded obligations due to foreign currency fluctuations above the budget rate. Transfers are made as needed to meet disbursement requirements in excess of funds otherwise available for obligation adjustment. Net gains resulting from favorable exchange rates are returned to this appropriation and are available for subsequent transfer when needed. The account is replenished through the utilization of a special transfer authority that allows the Department to withdraw unobligated balances from operation and maintenance and military personnel appropriations from prior years as long as the authorized limit of \$970 million is not exceeded at the time of the transfer.

DEFENSE HEALTH PROGRAM

For expenses, not otherwise provided for, for medical and health care programs of the Department of Defense as authorized by law, \$32,198,770,000; of which \$30,902,546,000 shall be for operation and maintenance, of which not to exceed two percent shall remain available until September 30, 2013; of which \$632,518,000, to remain available for obligation until September 30, 2014, shall be for procurement; and of which \$663,706,000, to remain available for obligation until September 30, 2013, shall be for research, development, test and evaluation.

The Defense Health Program (DHP) provides care to current and retired members of the Armed Forces, their family members, and other eligible beneficiaries. Beneficiaries may obtain care from the Military Department medical and dental facilities or through the civilian health care network under the TRICARE program.

Accrual accounting for Medicare-eligible beneficiaries began in 2003 and the health care for these beneficiaries is funded from the Department of Defense Medicare-Eligible Retiree Health Care Fund. The DHP also manages Research and Development funds appropriated by Congress, which support medical research and health information management systems development.

The DHP and Department of Veterans Affairs (VA) share the goal of improving the access, quality, and cost effectiveness of health care provided by VA and DOD. To this end, each Department contributes a minimum of \$15 million per year for joint health care incentives.

Health care is provided in military facilities as follows:

	2010	2011	2012
Inpatient Facilities	59	59	56
Outpatient Clinics	364	365	363
Dental Clinics	282	281	274

The DHP is staffed by:

	2010	2011	2012
Civilian work years (thousands)	60	60	58

The Defense Environmental Restoration Program provides for the identification, investigation, and cleanup of contamination resulting from past DOD activities. The Department has 26,293 sites that have a remedy in place or a response completed, leaving 4,934 open sites at active and Base Realignment and Closure (BRAC) Military installations and 1,894 active sites at Formerly Used Defense Sites (FUDS). For these remaining active sites, DOD is engaged in either a study to determine the extent of the contamination or the actual clean-up of the contamination.

The Department's environmental restoration program is funded by five separate environmental restoration accounts, one for each military department, one for defense agencies and one for FUDS. The first four accounts, Army, Navy, Air Force and defense-wide environmental restoration accounts cover funding for active installations, and are shown separately from the FUDS program environmental restoration account, which funds environmental cleanup on properties no longer owned and/or used by DOD. These five accounts include restoration activities ranging from inventory to preliminary assessment, then to investigation and clean up of contamination, and finally to closeout of a site. BRAC sites are funded separately under the relevant BRAC account.

PROCUREMENT

Appropriations in this title support the acquisition of aircraft, ships, combat vehicles, satellites and their launch vehicles, weapons and all capital equipment. Major systems in production typically are budgeted annually to maintain production continuity through the life of the acquisition program and in several instances multiyear contracts are used to ensure stability of production and economies of scale. Initial spares and support as well as the modification of existing equipment are also funded. Resources presented under the Procurement title contribute primarily to achieving the Department's annual goals of assuring readiness and sustainability, transforming the force for new missions, and reforming processes and organizations. Performance targets in support of these goals contribute to the Department's efforts to mitigate force management and operational risk, future challenges risk, and institutional risk.

Procurement in support of the ground forces encompasses wheeled and tracked vehicles, rotary wing aircraft, ammunition and equipment procured to meet inventory requirements dictated by the force size and anticipated mission requirements. Similarly, procurement in support of naval forces includes ships, equipment for the ships, aircraft, munitions, the Marine Corps ground element, and other equipment to sustain future naval operations. The Air Force programs support the broad range of missions and include aircraft, tactical missiles, ballistic missile weapons and associated surveillance and space assets keyed to the strategic deterrence mission, munitions and other mission support equipment.

Public Law 99–145 authorized an appropriation to the Chemical Agents and Munitions Destruction account to destroy the U.S. inventory of lethal chemical agents and munitions and related (non-stockpile) materiel thus avoiding future risks and costs associated with the continued storage of chemical warfare materiel. The program supports the Chemical Weapons Convention initiatives to rid the world of chemical weapons.

This program, first authorized in Public Law 102–484 (the 1992 Authorization Act), is to encourage commercial firms to use idle government owned, contractor-operated Army ammunition manufacturing facilities to ensure a viable industrial base for the manufacture of ammunition.

As required by the Federal Credit Reform Act of 1990, this non-budgetary account records all cash flows to and from the Government resulting from loan guarantees committed in 1992 and beyond (including modifications of loan guarantees that resulted from commitments in any year). The amounts in this account are a means of financing and are not included in the budget totals.

**RESEARCH, DEVELOPMENT, TEST, AND
EVALUATION**

Appropriations in this title support modernization through basic and applied research, fabrication of technology-demonstration devices, and development and testing of prototypes and full-scale preproduction hardware. This work is performed by contractors, government laboratories and facilities, universities, and nonprofit organizations. Research and development programs are funded to cover annual needs. Resources presented under the RDT&E title contribute primarily to achieving the Department's annual goals of transforming the force for new missions and reforming processes and organizations.

Funds for each fiscal year are available for obligation for a two-year period beginning on the first day of that fiscal year.

This year's Budget provides for major technology and development efforts. These include science and technology programs, development of weapons systems and supporting systems, including missile defense, and support of test and evaluation programs and necessary infrastructure. The Department continues to emphasize technology efforts that ensure that the Nation will maintain a technological advantage over potential adversaries.

In addition, DOD would carry out research within the Defense Advanced Research Projects Agency to allow spectrum relocation and conversion of selected wireless communications systems of the Department and those systems of other users, coordinating

activities as part of the Wireless Innovation (WIN) Fund. The initiative will also help improve the security, reliability and scalability of new wireless networks. The WIN Fund, which is part of the President's spectrum initiative, is described more fully in the Federal Communications Commission section of this Appendix.

DOD's request reflects the partnership between NNSA and DOD to modernize the nuclear deterrent. DOD is carrying a separate account for the outyears that contains the amounts for NNSA's Weapons Activities and Naval Reactors. These funds, shown in the table below, underscore the close link between these activities and DOD nuclear requirements and missions. OMB will ensure that these future budget year allocations to NNSA occur in the required amounts.

MILITARY CONSTRUCTION

The Military Construction programs are intended to provide facilities required as a result of new weapon systems entering the inventory, including aircraft and naval vessels, and other high priority initiatives. The program continues initiatives to realign the global defense posture, improve living and working conditions, reduce operating costs, increase productivity, and conserve energy by upgrading or replacing facilities which have become functionally obsolete or can be made more efficient

through relatively modest investments in improvements. Included in this request are resources required to clean up and dispose of property consistent with the five closure rounds required by the Base Closure Acts of 1988 and 1990.

The budget plan for each appropriation is shown as a separate table immediately following the program and financing schedules for those appropriations that are available for obligation for more than one year. In 2012 it presents, by budget activity, the value of the program requested for the life of the multiple-year appropriations. Resources presented under the Military Construction title contribute primarily to achieving the Department's annual performance goals of assuring readiness and sustainability.

FAMILY HOUSING

These appropriations finance all costs associated with construction, improvements, operations, maintenance, utilities, privatization, and leasing of all military family housing. In addition to quality of life enhancements, the program contains initiatives to reduce operating costs and conserve energy by upgrading or replacing facilities which can be made more efficient through relatively modest investments in improvements.

The Family Housing Improvement Fund (FHIF) was created to finance the use of innovative methods authorized in the National Defense Authorization Act for Fiscal Year 1996 (Public Law 104-106), under the Military Housing Privatization Initiative (MHPI) to meet the Department's housing needs. Under MHPI, it authorized the Department to use limited partnerships, make direct and guaranteed loans, and convey Department-owned property to stimulate the private sector to increase the availability of affordable, quality housing for military personnel. The funds required to privatize military family housing are transferred from the military departments' family housing construction accounts into the Family Housing Improvement Fund.

Resources presented under the Family Housing title contribute primarily to achieving the Department's annual performance goals of assuring readiness and sustainability.

The National Defense Stockpile program is managed under the authority of the Strategic and Critical Materials Stockpiling Act. The purpose of the Stockpile is to decrease or preclude U.S. dependence on foreign sources for supplies of strategic and critical materials in times of national emergency. Since 1993, Congress has authorized the sale of over 99 percent of the inventory as excess to Department of Defense needs.

Revenues from the sales of excess commodities are either deposited into the National Defense Stockpile Transaction Fund to finance the National Defense Stockpile program or are transferred to the Treasury for specific congressionally mandated programs or to reduce the deficit.

The Army's revolving fund activities evolved from two separate funds. The first type, Stock Funds, deals with procuring material in volume from commercial sources and selling to customers or holding in inventory. The second category, Industrial Funds, provides industrial services, such as depot maintenance, manufacturing, and ammunition storage. Both types of revolving funds are financed primarily by reimbursement from customers' appropriated accounts.

Section 662 of the National Defense Authorization Act for 1992 and 1993, Public Law 102–190, established the Voluntary Separation Incentive (VSI) Fund to more effectively manage and account for the costs of the Voluntary Separation Incentive program. The VSI program provides annual payments to former active-duty servicemembers who voluntarily left service after serving more than six but less than 20 years. For all members who left service after December 31, 1992, the Department of Defense was required to deposit the total present value of their future VSI benefits into the VSI fund by the time authority to approve VSI benefits ended on December 31, 2001. DOD was also required to cover the unfunded benefits of former members who separated before January 1, 1993 through yearly, actuarially-determined Government contributions from the DOD military personnel appropriations. Permanent authority to make these payments is contained in section 8044 of the 1997 Defense Appropriations Act. The fund also receives interest on its investments.

Section 2350k of U.S.C. Title 10 established a trust fund for cash contributions from any nation in support of relocation of elements of the Armed Forces within that nation. The Host Nation Support for Relocation account is financed through these cash contributions and interest accrued on the cash balances. Funds may be used to defray costs incurred in connection with the relocation for which the contribution was made.
